SKILLS

Frontend

React TypeScript
GraphQL / Apollo Redux
styled-components
React Native Angular
responsive HTML & CSS
Figma

Backend

PHP / Nette Node.js
Express REST & GraphQL APIs
MCP server design
SQL databases

Deployment & operations

Docker CI/CD ArgoCD
Grafana Sentry PagerDuty

Full lifecycle

analysis & design
UX & prototyping architecture
Vitest Playwright

LANGUAGES

Czech — native
English — fluent

OTHER

Driving licence, category B

20+
years of development

2+ yrs
of daily AI development

4
banks in 3 countries

PROFILE

I build web applications from design to production. 20+ years of commercial development behind me: e-shops, accounting systems, internet banking and a complex data quality management platform at Ataccama. For the past 2+ years I've been building with AI every single business day.

BUILDING WITH AI

For the past 2+ years I've been programming with AI daily and in depth. Not as an autocomplete, but by working with AI agents like a team. I know where AI speeds things up dramatically, and where it takes an experienced engineer to review the result and own it.

From brief to plan

I turn a brief into a spec and a step-by-step plan with AI, so decisions are made before the first line of code.

Quality stays in check

Tests, code review and in-browser verification. AI speed never comes at the cost of quality.

Agentic development

I drive implementation through AI agents: tasks run in parallel, and every step gets its own tests and review.

Experience as a filter

20 years of practice tell me what to accept from AI and what to rewrite.

EXPERIENCE

2022 – now

Ataccama

Frontend Engineer

Building Ataccama ONE, a complex data quality and data management platform used by large companies worldwide.

React · TypeScript · GraphQL · Docker · CI/CD · Figma

2012 – 2022

Vanio Solutions / Finshape - Banking Software Company

Frontend developer — internet banking

Retail and corporate internet banking for VTB and TBC (Georgia), Access Bank (Azerbaijan) and Slovenská sporiteľňa. Moved from AngularJS through Angular to React and React Native, in teams of 5 to 20+ people across three countries.

React · Angular · TypeScript · React Native · PHP / Nette

2000 – 2013

Webengine Studio & more

Websites, e-shops and database applications

My own CMS ClickPress, which ran almost 50 websites, plus e-shops, accounting systems and applications for non-profits and businesses. For 14 years I also ran my own online bookstore, so I know e-commerce from the owner's side too.

PHP · Nette · MySQL · jQuery · OpenCart

EDUCATION

Mendel University in Brno

Ing. (MSc) — Wood Engineering and Furniture Design

2006
